[Powerchute Business Edition V9.0.1 For Windows Download](#)

The screenshot shows the PowerChute Personal Edition software interface. The window title is "PowerChute Personal Edition". The main area displays a "Performance" tab with a warning icon and the message: "Your battery backup last intervened on 12/7/2011, at 1:21:54 PM." Below this is a "Power Problem History" section with a dropdown menu set to "4 Weeks". A table shows the following data:

Power problem	Unit switched	Time on battery
Blackout	1	5 seconds
Undervoltage	0	None
Overvoltage	0	None
Electrical noise	0	None
Total:	1 times	5 seconds

At the bottom of the interface, there are three summary boxes: "Energy Usage Rate" (0.00 kWh per day), "Estimated Battery Time" (740 min), and "Power Source" (AC Utility Power). A status bar at the very bottom indicates "Your battery backup is operating normally".
